

# 5. Transporting the bricks

Before the widespread use of the internal combustion engine, transporting bricks by road was slow and expensive. As a result, the production and use of bricks was localised.

*Loading bricks onto the barge "Langstone" for delivery along the coast.*

*An early steam-powered lorry ready to be loaded with bricks at Bursledon Brickworks*

The Rowlands Castle Brickworks benefitted from the arrival of the railway in 1859
